Experience with Agile and Scrum development process

PROJECTS

Salon Admin (03/2023 - Now)

Customer	Korea
Description	The Salon Admin project is a management system for salons, helping with tasks like appointment scheduling, customer and service management, and financial tracking. It allows salon owners and staff to organize customer info, monitor schedules, and track revenue, while also supporting marketing features like reminders and promotions to improve customer service and business efficiency.
Team size	15
My position	Frontend Developer
My responsibilities	 Design and develop interface pages such as appointment scheduling, customer and service management, and reports Create interactive components like calendars, tables, and input forms to enable easy user interactions. Optimize the interface's performance to ensure smooth functionality on both mobile and desktop devices Collaborate with the backend to display accurate data and ensure feature functionality. Ensure the interface aligns with the design and requirements from the UI/UX team.
Technologies used	 Frontend: Vue, Ant design, Javascript, Typescript, PWA Backend: .Net, Microservice, Azuze

Salon Headquarters (03/2023 - Now)

Customer	Korea
Description	This site is used by clients to set up the services and products they want to offer, with configurations that are shared across all stores within their chain.
Team size	15
My position	Frontend Developer
My responsibilities	User Interface Development: Build an intuitive, user-friendly interface for clients to easily configure and manage services and products across all chain stores.

	 Data Synchronization and Display: Integrate with backend data to ensure configurations are accurately reflected and shared in real-time across the chain, providing a seamless experience Responsive and Accessible Design: Implement responsive design principles to ensure smooth use across various devices and ensure accessibility for all users.
Technologies used	 Frontend: Vue, Tailwind CSS, Javascript Backend: .Net, Microservice, Azuze

Integration Admin (03/2023 - Now)

Customer	Korea
Description	This site is designed for Ahasoft to manage shops (SH and SA) after successfully selling services to salon clients
Team size	15
My position	Frontend Developer
My responsibilities	 Develop interactive and user-friendly dashboards for managing shop data and tracking service sales. Collaborate with the backend team to maintain a cohesive and functional experience
