Languages

Vietnamese
Native

English
Elementary. Read and understand documents.

Skills

Main : HTML5, CSS3, Preprocessors (PUG, SASS, SCSS), JS, VueJS, NuxtJS

Other : TS, ReactJS, SourceTree, GIT, UI components (Ant design, ElementUI, Tailwindui, etc.), Gulp / Webpack / Vite, RESTful API, SEO, UX/UI, Greensock

Projects

Shinichiro - Timeline: 4 months

Client : Japan.

Descriptions :

- The project's idea is about better the quality of products and work efficiency by building an online system that promotes group activities between co-workers in the company. The staff will be divided into many departments, workplaces and circles. Members of the circle will come up with ideas and make plans to develop their ideas using the tools of the system.

- In terms of the project's source code structure, both the backend and frontend are merged into a single source using InertiaJS. It utilizes the routes defined in the backend to navigate to different pages, so the frontend does not need to use react-router to define routes

Number of members : 5

Position : Frontend Developer

Responsibilities :

- Rebuild the UI based on the existing website.
- Build reusable UI components using Ant Design.
- Connect to the Backend API for data processing and logic functions.
- Handle the logical functions within the project and report progress to the leader.
- Reuse related logic to improve performance.
- Modify requirements, maintain, and debug issues during the development process.
- Review and test own code on development, staging, and production environments

Technology in use : react, react-i18n, axios, ant-design, formik, etc.

---

gumi Internal (2 modules) – *Timeline: 8 months*

Client : gumi Inc.

Descriptions : Web-based system is used to calculate the budget to operate the project, calculate and track the profit and loss of the project, establish the average value for the cost-related data of the management company and report over budget and other project management tasks for managers and team leaders,...

Number of members : 8

Position : Frontend Developer
